MINISTER'S COLUMN

It is a good thing to know the history of your town and state, a finer appreciation will stir within you as you recall the pioneer days when men and women braved the dangers of the frontier life. You will appreciate more the comforts and conveniences of today.

In the year 1837 on the 20th day of October at 3 A. M. Stow township was visited by a hurricane. The storm swept everything before it in a path of thirty-five rods, coming from south west to north east. The wind struck the house of Fredrick Sanford and scattered it into a thousand pieces. The family was asleep anticipating no danger, the daughter alone survived to tell the story, the bed on which she slept was found in a tree top thirty feet from the ground, father, mother and other members of the family were all killed.

Little Mary Campbell twelve years of age and a Mrs. Stewart were captured by Indians that lived in the Silver Lake area. This camp of Indians in the fall of 1759 made a foray on some isolated homes near what is now the town of Kittanning, Pennsylvania, little Mary was put to work hoeing corn. She was returned to her home in Pennsylvania. I wonder now of the history we are making in the mighty conflict of right and wrong forty miles up the Allegheny river from Pittsburgh. The two captives were brought to the wilderness of Ohio. Little Mary was held captive in the rocks called Old Maids Kitchen, Cuyahoga Falls. The Indians in 1759 raised corn in fields now known as North Akron, here little Mary was put to work hoeing corn. She was returned to friends in Pennsylvania in 1759. Forty-nine males and sixty-four females were delivered to Colonel Bouquet at his Tuscarawas headquarters, this company of captives all belonged to Pennsylvania, others released by the Indians for their homes in Virginia, brought the number up to 356 in all. This large number of people in Indian captivity within a small area of Ohio and surrounding Stow. A little black bear owned by the father of our own W. R. Lodge at the Silver Lake Resort, was attacked by a swarm of bees. The little animal howled with pain, it struck viciously at its enemies and ran about frantically. Now how do you suppose it escaped from the bees? Well, it had a pool to swim in and into that pool it plunged, it submerged all but its little nose. Interesting history of a small radius surrounding your as it storms the world today.

GEO. M. HULME, Minister
